

RECONSTRUCTION DIVISION

Reconstruction Division

After restoration services have been completed, properties are normally in need of some level of reconstruction. From reattaching baseboards and reinstalling flooring to replacing studs and rebuilding walls, ceilings, roofs, siding, etc. the Mendco Construction Co. structure division can perform all necessary reconstruction items to complete the project.

Before the job begins, our estimators (using the same software used by most Insurance Adjusters) spec out the entire project, making sure the pricing is accurate, all replacement materials are accurate and every line-item is

insurance-approved. Our experienced project managers manage the job from start to finish, keeping all involved laborers on task and on time.

RECONSTRUCTION SERVICES INCLUDE, BUT ARE NOT LIMITED TO:

- Structural Repairs
- Electrical
- Plumbing
- HVAC
- Windows/Doors
- Interior Design
- Flooring
- Tile
- Ceilings
- Drywall
- Roofing
- Siding
- Exterior Finishes
- Carpentry
- Framing
